

ASRAGEN - Services and Industries Portfolio

This document is a comprehensive starter portfolio for ASRAGEN.

Detailed Services

IoT Solutions

We design end-to-end Internet of Things solutions including connected devices, sensor integration, cloud connectivity, dashboards, alerts, automation, predictive maintenance, remote monitoring, firmware, deployment, and support for homes, businesses, industries, and agriculture.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Smart Home Solutions

Home automation covering lighting, HVAC, smart plugs, locks, CCTV integration, intrusion detection, voice assistants, energy monitoring, and mobile control.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Industrial IoT

Machine monitoring, OEE dashboards, predictive maintenance, production tracking, SCADA integration, alarms, asset tracking, and energy optimization.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment

- Training
- AMC & Support

Embedded Systems

Custom electronics, PCB design, firmware, ESP32, STM32, Arduino, Raspberry Pi, communication protocols, testing, and product development.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Web Development

Corporate websites, SaaS platforms, portals, dashboards, APIs, SEO, responsive UI, authentication, analytics, and maintenance.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Mobile Apps

Android/iOS/cross-platform apps with cloud sync, offline support, notifications, barcode scanning, payments, GPS, and IoT control.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Enterprise Software

ERP, POS, billing, inventory, CRM, HRMS, payroll, accounting, analytics, reporting, and multi-branch management.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Cloud & AI

Cloud architecture, APIs, data pipelines, AI assistants, predictive analytics, computer vision, and automation.

What we provide:

- Consultation
- Design
- Development
- Testing
- Deployment
- Training
- AMC & Support

Industries We Serve

Retail

What we do:

POS, inventory, barcode systems, customer analytics, loyalty programs, smart shelves, sales dashboards.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Manufacturing

What we do:

Machine monitoring, quality control, predictive maintenance, production analytics.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Agriculture

What we do:

Smart irrigation, soil monitoring, weather stations, livestock tracking.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Healthcare

What we do:

Asset tracking, patient monitoring integrations, appointment systems, dashboards.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Education

What we do:

Attendance, campus automation, ERP, library and transport management.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Hospitality

What we do:

Hotel management, access control, smart rooms, energy optimization.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Logistics

What we do:

Fleet tracking, warehouse monitoring, RFID, cold-chain monitoring.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Commercial Buildings

What we do:

BMS, lighting automation, HVAC optimization, access control, CCTV integration.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Energy & Utilities

What we do:

Smart metering, solar monitoring, energy analytics, load optimization.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Smart Cities

What we do:

Environmental monitoring, traffic analytics, smart parking, waste management.

Deliverables include requirement analysis, hardware selection, software platform, cloud dashboard, mobile app, analytics, deployment, training, and long-term maintenance.

Technologies

ESP32, STM32, Arduino, Raspberry Pi, Flutter, React, Next.js, Node.js, Python, PostgreSQL, Supabase, MQTT, REST APIs, Docker, AI frameworks, and cloud platforms.
